Dear President Obama;

Please by proclamation protect from oil, gas and mineral mining the most wondrous ocean place in the Atlantic Ocean. Include five of New England's ocean canyons (Oceanographer, Gilbert, Lydonia, Nygren, and Heezen Canyons), four seamounts (Bear, Physalia, Mytilus, and Retriever), and the Cashes Ledge Closed Area.

Please use the Antiquities Act to continue the good work of the Northeast Regional Planning Body unfettered by Congress. The planners consist of eleven federal authorities including the New England Fishery Management Council, eleven state agencies from all six New England states, and ten tribal members.

We're gone to ~~the~~ other planets, to space, literally out of this world and discovered the coolest things around and it's been amazing! But the ocean is one of the least explored places that we haven't really gone deep down to which is funny because it's literally right there! There is so much to see, so much to discover, it is not fair to to take away that sort of recognition from a place that can hold so much potential. I mean can you imagine the sort of crazy creatures that live under there!
